CORPORATE SOCIAL RESPONSIBILITY SPONSORSHIP

Join us in our mission to ensure that every child in Ireland is climate literate by 2030. You can do this by sponsoring schools in your local area to receive our 10-week, action-based climate literacy programme. Our CSR packages provide businesses an opportunity to implement real and positive change as we work together to educate and empower future generations to act for sustainable development. We also offer corporate training, and we will even plant trees on your behalf.

SUSAN ADAMS
Education for Sustainability

WHO WE ARE

Education for Sustainability is a non-profit social enterprise aimed at increasing climate literacy and fostering behaviour change within schools in Ireland.

We created this programme as a direct response to the escalating decline of the natural world and our vision is to educate our young people to ensure they have the knowledge and skills needed to make sustainably conscious decisions in their everyday lives. We also want to ensure that they understand their part in the overall picture and feel empowered to take action.

We are reaching out to local businesses with a unique opportunity to get involved with this programme in line with your Corporate Social Responsibility priorities.

HOW IT WORKS

Choose a CSR corporate package that works for you. Schools within your area will be selected and awarded your sponsorship. The school will timetable our climate literacy course.

An Education for Sustainability facilitator will visit the school weekly for 9 weeks to deliver the programme and simultaneously train the teacher.

The teacher will deliver an action project with the students on week 10. All resources, lesson plans and the student workbook will be accessed through our online MYQUEST training portal.
Each class is game-based, action focused and interactive.

The facilitator leaves at the end of the programme and the teacher continues to teach the course with a new group of students. The programme can be delivered in school for many years to come once the teacher is trained, making YOUR investment sustainable!

THE BENEFITS OF OUR CLIMATE LITERACY PROGRAMME

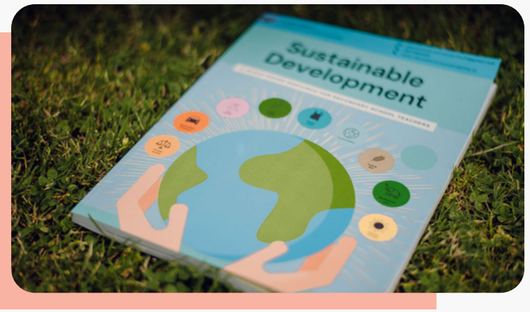
For Students

- Topical and action-based course that equip them with the skills, tools and knowledge to live more sustainably.
- Provides opportunity for development of soft and hard skills valuable for future study and employment including: team-work, communication, peer education, community engagement, project-management and research.
- Provides platform to develop an idea into an action with measured results.
- Offers a platform to identify future jobs across green sectors.

For Teachers

- Receive training and resources that enable them to confidently teach a 10-week climate literacy module.
- Use of an interactive online learning platform allows teachers to support their students further and on an ongoing basis even as climate science and news evolves.
- Improved educational knowledge as well as confidence in using active learning methodologies. Increased their confidence in integrating climate literacy their other subject areas.

Learn more here | Education for Sustainability



For Principals

- Principals benefit from a 30-week climate literacy course and teacher training for their school.
- A relevant and up to date action-led course for students.
- Learning objectives meet the criteria of Statements of Learning and numerous curriculum criteria set by the Department of Education.
- A sustainable and accessible programme for teachers to deliver. Training is delivered in school therefore there is no cost for substitute teaching After a one-time investment (followed by a small annual subscription) schools have a topical course that they can delivery for many years to come with annually updated resources and continued CPD training for teachers.
- A programme that promotes global citizenship and community engagement and improves the sustainability of the school itself.

For your company

- Align your CSR with global and local climate goals
- We will offer training to your staff if desired and we will even plant trees on your behalf!

WHY YOU SHOULD CONSIDER SPONSORSHIP

1. Aligns with the United Nations Sustainable Development Goals;

2. Community development: Collaborating with schools in a local area;

3. Building community partnerships through climate action projects;

4. Developing climate literacy for the future workforce;

5. Sponsoring and making meaningful change through education and action Projects;

6. Trains teachers which improve the sustainability of the programme;

7. Inspiring and empowering young people to be the change they want to see in the world through climate literacy;

8. A programme that promotes global citizenship and community engagement.

TESTIMONIALS

Patrick Kirwan Science Teacher Ardscoil Na Mara Waterford

"I've started teaching Susan's course this year for the first time. It's absolutely brilliant. The students love it. It's a chance to try a different way of teaching. There are lots of fun engaging games and activities that enhance the students' experience and learning. Some of these activities and games can also be applied to other areas of the curriculum.

The course is well structured and gives the students a really good foundation in sustainability. It is also action focused. All the way along students learn what they can do to address the climate and nature emergency.

Susan provides a lot of training and support to teachers running the course, at the beginning of the course and throughout the year. She also lives and breathes sustainability. Her course is a lived experience. She teaches it herself. If you are looking to up skill yourself and your students get in touch with Susan and sign up!"

TESTIMONIALS

Ann O’Reilly St Raphaels, Co Dublin

"Sue's programme is an integral part of St Raphaela's Transition Year programme, and has been for the past four years. Sue engages very well with our students through active methodologies in exploring this very important topic of sustainability. Our students have particularly enjoyed peer teaching, involving other years in the school as well as our local primary schools. They also love doing a beach clean during the module. Sue's passion and enthusiasm are infectious. After the module our students are more aware of the need for sustainable living and better equipped for action. Sue is wonderful to work with, always adaptable and totally reliable. She is a true educator and I highly recommend this programme."

CSR SPONSORSHIP PACKAGES
